Review of a seminar paper

Paper title: Set here the title of the reviewed paper

Remove the red texts for your review final. Please be always polite and constructive with your remarks and judgements. Here is a list of potential aspects to consider:

- ***Soundness** of the seminar paper:*
  - *Are the definitions and theorems stated correctly?*
  - *Is the notation consistent throughout?*
  - *Are the examples correct?*
  - *Is every claim either cited or argued?*
- ***Clarity** of the presentation:*
  - *Are prerequisites introduced?*
  - *Is intuition provided, e.g. before formal definitions?*
  - *Is technical content provided?*
  - *Are there examples?*
  - *Is the presentation concise?*
  - *Are the figures, tables, and other visual aids helpful and well-designed?*
  - *How are the layout and typography?*
  - *Are there grammar or spelling mistakes?*
  - *Does the introduction state the goal and give an outline?*
  - *Are there any sections that are particularly difficult to understand?*
  - *Does the conclusion actually conclude?*
- ***Coverage** of the seminar topic:*
  - *Does the paper address the assigned topic?*
  - *Are the key results included, at a depth that suits the page limit?*
- ***Literature and related work**:*
  - *Are primary sources cited rather than secondary ones?*
  - *Is every borrowed idea attributed?*
  - *Are the bibliography entries complete and consistent?*
- ***Faithfulness to the sources and own contribution**:*
  - *Does the paper describe the original work accurately?*
  - *Has the author gone beyond the assigned papers?*
  - *Has been made clear which parts are the author's own (examples, comparisons, critique) contribution?*

Feel also free by extending the list by your own criteria. Your review should be at max two pages finally

Summary

Please summarise the main content, claims, and contributions of the seminar paper in your own words. Please do not include your evaluation of the paper here.

Overall Score

Provide an overall score for the seminar paper. Four scores are available:

- ***Major Revision*** *(there are many aspects to be revised in this paper and these edits are substantial)*
- ***Minor Revision*** *(there are only few minor aspects to be revised)*
- ***Acceptable*** *(the paper is fine as it is, modulo some minor remarks and potential improvements which could be undertaken, but are optional)*
- ***Outstanding*** *(the paper is exceptionally well written and there is nearly nothing to be complain about)*

Justification of the Overall Score

Provide here a justification for your overall score. It might be not necessary to write about all the aspects provided in the beginning. Use them as guideline to describe the strengths and weaknesses of the paper that lead to your overall score

Major remarks

Provide major remarks here on how the paper could be improved, e.g., different structure of the paper or hints on how the technical content could be presented alternatively. Also provide here open questions to the author (if there are any).

Minor remarks

Provide minor remarks here regarding language and grammar, formatting and style, missing citations and ideas for improvement of clarity which affects the text only locally. Give locations ("p. 3, l. 12" or "Sec. 2.1, Def. 3").

Confidence

Undertake here a self assessment regarding your own confidence with respect to the review by provding one of the following conference levels:

- ***Very confident*** *(I have checked all points of the paper carefully, and I am certain I did not miss any important aspects)*
- ***Confident*** *(I tried to check the key points in the paper; it is unlikely, though conceivable, that I missed some important aspects)*
- ***Weakly confident*** *(I was unable to carefully check some of the details, e.g., proof, contribution, examples ..., but I am able to defend my evaluation of the paper; it is quite likely that I missed some important aspects)*
- ***Not confident*** *(My evaluation feels like is an educated guess)*
